

Peppers		
Olympus	Sweet Bell Pepper	<p>Large flavorful bell peppers. Widely adapted, Olympus has performed well in both the South as well as warmer regions in the North. Medium size plants with good leaf cover. High-yielding, uniform fruit with good flavor. High resistance to bacterial leaf spot races 1-3.</p> <p><i>Johnny's Selected Seeds</i></p>
King of the North	Sweet Bell Pepper	<p>A good choice if you want early marketable blocky peppers. Back in the late '80s when Seed Savers Exchange co-founder Kent Whealy keynoted at the Common Ground Fair, we asked him to suggest a pepper that would ripen in the North. His suggestion was King and it has been our most popular open-pollinated bell ever since. Prone to blossom-drop in heat.</p> <p><i>Fedco Seeds</i></p>
King Arthur	Sweet Bell Pepper	<p>For early production of large green or red bells. Plants are large and early to bear big crops of large, thick-walled fruits. Widely adapted. High resistance to bacterial leaf spot races 1–3, 7, and 8, and potato virus Y.</p> <p><i>Johnny's Selected Seeds</i></p>
Milena	Sweet Bell Pepper	<p>Blocky orange pepper for heated and unheated tunnels. Milena's resilient plants perform well in both low-tech greenhouses and unheated tunnels. The medium-large to large fruits are deep orange and have very good flavor. High resistance to potato virus Y, tobamovirus races 0-3; and intermediate resistance to tobacco etch virus and tomato spotted wilt virus.</p> <p><i>Johnny's Selected Seeds</i></p>

Gourmet	Sweet Bell Pepper	<p>A blockbuster variety for yield, quality and flavor. These sturdy plants bear big, plump, juicy-sweet peppers that ripen to a gorgeous glossy orange. Plants are both vigorous and high yielding with excellent disease resistance. Gourmet Orange peppers are real beauties, heavy for their size, with thick walls, crunchy texture and fine sweet taste. Enjoy their delicious crispy flesh as a snack right out of the garden and use them for colorful, nutritious grilling, salads, stir frying or sautés.</p> <p><i>Renee's Garden</i></p>
Heirloom Italian Sunset Mix	Sweet Peppers	<p>Beautiful heirloom mix yields huge, elongated tapering fruits with thick, meaty flesh that mature to rich red, yellow or orange. Perfect for snacking, salads, sautees, or roasting.</p> <p><i>Renee's Garden</i></p>
Italia	Sweet Pepper	<p>This corno-di-toro ("horn of the bull") type of sweet pepper earned high marks from Seed Savers Exchange staff at a 2014 tasting at our Heritage Farm headquarters. Curved, tapered fruit mature from green to red, have thin walls, and taste very sweet (not hot). Erect plants grow 14-28" tall and have sparse branching, green leaves and stems with light-purple nodes, and white flowers. Mature fruit reach 5-7" long and 1.5-3" wide. Introduced in 1987 by Johnny's Selected Seeds of Albion, Maine, this variety has been shared within the SSE Yearbook Exchange community ever since. 70-80 days from transplant.</p> <p><i>Seed Savers Exchange</i></p>
California Wonder Pepper	Sweet Bell Pepper	<p>An old-time favorite since 1928 for good reason! 'California Wonder's' large, uniform shape makes it ideal for stuffing. Delicious grilled, they are perfect for shish kabobs. Peppers left on the plant will turn a beautiful, bright red, and have more vitamin C than an orange! Good container variety, and dependable performer even in short season climates.</p>

		<i>Botanical Interests</i>
Habanada	Sweet Pepper	<p>All the floral sweetness of the famous habanero, minus the burn. 100 days to maturity; 70 days for green peppers.</p> <p>Through years of crossing, selection and DNA analysis, Michael Mazourek, at Cornell University, discovered how to limit the habanero's heat while preserving its floral and melon-like flavors. The resulting "Habanada" is aromatic with lingering sweetness, and it defies everything we've come to expect from a pepper. You can eat them green and unripe for a potent hit of aroma or savor the habanadas' full potential as a bright orange flavor bomb.</p> <p><i>Row 7 Seed Company</i></p>
<b>Jedi Jalpeno</b>	Hot Pepper	<p>Jedi's fruits avg. 4–4 1/2" and are slow to check (show small cracks in skin). The large plant produces over a long harvest window, especially in regions with a long growing season. Our jalapeño variety with the highest potential yield. High resistance to bacterial leaf spot races 1-3.</p> <p><i>Johnny's Selected Seeds</i></p>
<b>Black Magic Jalapeno</b>	Hot Pepper	<p>Extra-dark with traditional checking. The darkest jalapeño we offer. Fruits avg. 3 1/2–3 3/4" and exhibit "checking" (small cracks in the skin) that indicates the fruits are ready for harvest. They may be harvested before checking, but the harvest window for this is shorter. The productive, medium-size plants have a high yield potential. The extra-dark green color is a significant advancement in jalapeño breeding. Intermediate resistance to bacterial leaf spot races 1–3</p> <p><i>Johnny's Selected Seeds</i></p>
<b>El Eden Guajillo</b>	Hot Pepper	<p>Guajillo for Mexican mole. Tall, strong plants produce high yields of smooth, 7-8" fruit. Only slightly hot, this type is often used for mole.</p>

		<p>It also makes excellent powder. Not recommended for fresh use, as the skins are relatively tough. Popular in Mexico.</p> <p><i>Johnny's Selected Seeds</i></p>
Impala Serrano	Hot Pepper	<p>New! Traditional-sized serrano. Impala's fruits average 3–3 1/2" and are borne on large, bushy plants. The dark green fruits are traditionally used green but also make fine chipotles if allowed to ripen to red.</p> <p><i>Johnny's Selected Seeds</i></p>
Red Paper Lantern Habanero	Very Hot Pepper	<p>Exclusive! Earlier and more productive than regular habaneros. Magnificent, elongated and wrinkled, red, lantern-shaped fruits are 3-4" long. Early maturing for a habanero. Tall plants. Bred by Janika Eckert.</p> <p><i>Johnny's Selected Seeds</i></p>
<b>Cucumbers</b>		
Bush Slicer	Container Cucumber	<p>Bush Slicer offers juicy slicing cucumbers in record time on dwarf bushes, perfect for small space or container gardens. The straight, 6 to 8 inch-long fruits have smooth, tender skin with small seed cavities and sweet, crisp flesh. These sturdy indeterminate hybrid vines yield strong crops in both cool conditions and real summer heat. Bush Slicer is resistant to powdery mildew, cucumber mosaic virus and scab. Enjoy this space-saving cucumber in delicious salads from your own patio this season.</p> <p><i>Renee's Garden</i></p>
Lemon		<p>The Lemon cucumber is very tender, clean, crisp and sweet taste that is never bitter! This variety is a great cucumber for salads and pickling. Don't be fooled by this heirloom's unusual shape, these bright yellow balls are excellent for salads and pickling! This plant produces regular-sized vines that yield heavily and for a long time.</p> <p><i>Urban Farmer</i></p>

Marketmore 76		Popular OP variety. Long, slender, dark green cucumbers. The slender, refined "Marketmore look" has long been the standard for slicing cucumbers in the North. 8–9" fruits stay uniformly dark green even under weather stress. Begins bearing late, but picks for a relatively long time. High resistance to scab; and intermediate resistance to cucumber mosaic virus, and powdery mildew. <i>Johnny's Selected Seeds</i>
<b>Eggplants</b>		
Gaudi	Bell Shaped	F-1 hybrid. An eggplant <i>sui generis</i> as the architectural work of its Catalan namesake Antoni Gaudí. <b>Dark purple</b> 7–8" tapered half-long bell-shaped fruit with a <i>thornless</i> light green calyx. <i>Fedco Seeds</i>
Galine	Bell Shaped	High-yielding Black Bell type. Very glossy, uniform, black to purple fruits are 6-7" long by 3-4" in diameter. Strong plants produce early, firm fruits. High yielding, even in the North. <i>Johnny's Selected Seeds</i>
Diamond	Bell Shaped	Known for excellent texture and flavor, this variety bears dark-purple eggplants with green-tinted flesh that are 9" long and 3" in diameter. The fruits are borne in clusters of four to six on 2'-tall plants, disease-resistant, and rarely bitter. Seed Savers Exchange collected the variety from the Ukraine in 1993. <i>Seed Savers Exchange</i>
Pingtung Long	Asian	Long Ping Tung Eggplant Seeds originate from Ping Tung, Taiwan. Plants are disease resistant and do well even in heat. Fruits produced are 12-18" long and 1.25" wide. They are various shades of purple. After 65-90 days, fruits should be ready for harvest, and can be removed from the plant by cutting the stem 1" away from the fruit. Fruits are sweet and tender with no bitter taste. They can

		<p>be eaten without being skinned or cooked and still retain their sweetness.  <i>Kitazawa Seed Co.</i></p>
Orient Express	Asian	<p>The most dependable Asian eggplant. High-yielding plants produce armloads of attractive, slender, and glossy fruits 8-10" long by 1 ½"-2 ½" diameter. Ready up to 2 weeks before other early varieties and sets fruit in cool weather and under heat stress. Tender, delicately flavored, and quick cooking.  <i>Johnny's Selected Seeds</i></p>
Traviata	Italian Style	<p>These shiny, deep purple Italian-type eggplants set fruit all season long. Fruit grow to a uniform 6-8 inches but can be picked at an earlier stage for delicious baby eggplant; the healthy, upright plants will just keep 'em coming! Traviata has excelled through less-than-ideal seasonal conditions and even managed to grow past some heavy flea beetle pressure where other varieties struggled.  <i>Territorial Seed Company</i></p>
<b>Asian Greens</b>		
Central Red Mizuna	Mustard	<p>Hybrid. Non-GMO. Brassica juncea. 20-25 days to baby leaf, 40-55 days to maturity. Cool season annual. With more deeply cut leaves than regular Mizuna, this attractive purple stem variety adds color and texture to baby leaf mixes.  <i>Kitazawa Seed Company</i></p>
Red Choi	Cabbage	<p>Hybrid. Non-GMO. Brassica rapa Chinensis group. 10-15 days microgreens; 20-30 days baby leaf; 45 days full maturity. Cool season annual. This special hybrid pak choi has dark red leaves with green undersides. At maturity the petioles are light green. It has a</p>

		<p>delightful flavor. A colorful addition to a microgreens mix. Harvest as baby leaf and at full maturity.</p> <p><i>Kitazawa Seed Company</i></p>
Big Stem Broccoli	Broccoli	<p>Chinese Broccoli - Big Stem. Heirloom, Non-GMO. Brassica oleracea var alboglabra. 60 days. Cool season annual. Chinese broccoli is a popular Chinese green vegetable and is grown for its stalks and leaves. This open pollinated variety has deep green color, good flavor and BIG stems that are crisp and excellent for slicing. Stems are 12-18" at harvest, tolerant to cold, and slow bolting.</p> <p><i>Kitazawa Seed Company</i></p>
Dash	Spinach	<p>Chinese Broccoli - Big Stem. Heirloom, Non-GMO. Brassica oleracea var alboglabra. 60 days. Cool season annual. Chinese broccoli is a popular Chinese green vegetable and is grown for its stalks and leaves. This open pollinated variety has deep green color, good flavor and BIG stems that are crisp and excellent for slicing. Stems are 12-18" at harvest, tolerant to cold, and slow bolting.</p> <p><i>Kitazawa Seed Company</i></p>
Okame	Spinach	<p>Okame - Hybrid. Non-GMO. Spinacea oleracea. AKA bo cai, bo tsai, horensa. 50-55 days. Warm season annual. An early-maturing hybrid, this Japanese variety is recommended for summer harvest as it tolerates hot, dry conditions, is slow to bolt, and has good resistance to downy mildew. This variety has thick, medium green lobed leaves and is resistant to downy mildew 1 &amp; 2 and high tolerance to 3. Prefers mild and cool temperatures.</p> <p><i>Kitazawa Seed Company</i></p>
Suiho	Broccoli / Kale	<p>Suiho - Hybrid. Non-GMO. Brassica oleracea var alboglabra. Also known as Noble Jade or Emerald Green variety and is medium maturing. 50-55 days. Cool season annual. This variety of Chinese kale/broccoli has round medium green leaves that are slightly</p>

		wrinkled with 3/4" thick stems. The thick stem is shorter and thicker than Ryokuho variety yet tender and crispy making this a grower choice. The plant grows about 14" tall and is semi-spreading. <i>Kitazawa Seed Company</i>
<b>Herbs</b>		
Prospera® Compact DMR		Outstanding, compact Genovese basil with downy mildew and Fusarium resistance. The dense, slow-bolting plants produce large, 3–4", dark green, glossy, heavily cupped leaves. Traditional Genovese aroma. Uniform plants with short spaces between leaves produce high yields. Excellent for live plant, container, and hydroponic production, as well as gardens. Well-suited for leaf and tip harvest. <i>Johnny's Selected Seeds</i>
Prospera® DMR (F1)		Multi-use Genovese basil with downy mildew and Fusarium resistance. Glossy, deep green leaves with authentic Genovese aroma are 3" long and beautifully cupped. A semi-compact plant with medium-length internodes. <i>Johnny's Selected Seeds</i>
Amsterdam Seasoning Celery	Herb	A traditional Continental favorite, seasoning celery resembles big Italian parsley plants. This useful kitchen herb is grown for its sprays of glossy, celery-flavored leaves; it does not form thick stalks. The savory leaves have an intense celery taste that adds a rich, mellow undercurrent of flavor to stews, soups, casseroles, or any slow cooking dish. Use the leafy sprigs in everyday cooking or just air dry the leaves to keep their sweet pungent flavor for long-term use. <i>Renee's Garden</i>

Cilantro		Coriander. Also known as Chinese Parsley or Cilantro, you can use both the seeds and the leaves for flavoring. This variety is slow to bolt, very cold resistant, and easy to grow. <i>Seeds from Italy</i>
Leafy Diana Dill		Heirloom dill's feathery blue-green leaves have a fine aromatic scent that is delicious in green salads, eggs & with potatoes, or rice. Blossoms bring butterflies to the garden. <i>Renee's Garden</i>
English Thyme	Herb	Easy to grow heirloom garden staple with mounds of cascading tiny aromatic leaves. A basic herb for all Mediterranean cuisines with a wide range of uses in the kitchen. Perennial. <i>Renee's Garden</i>
Mexican Tarragon		Mexican tarragon is a type of marigold that produces delicious leaves with notes of anise. It can be used as a substitute for French tarragon, and it is easier to grow in heat and humidity, while being fairly drought tolerant. The leaves have a stronger flavor so less is needed to flavor a dish. Excellent container herb that can be grown indoors during the winter. Also called Mexican Mint and Spanish, Texas, or Winter tarragon. <i>Botanical Interests</i>
<b>Kale</b>		
Lacinato	Italian Heirloom	This unique heirloom's thick crinkled leaves are a beautiful deep blue-green that is an absolute standout in the garden. Lacinato has a fine, sweet, full flavor; never strong or overbearing. This distinctive Italian favorite (also nicknamed "dinosaur kale" because of its

		<p>primeval appearance) is both cold and heat tolerant in all climate zones. You can harvest big delicious bouquets of nutrition-packed, richly-colored leaves for months to steam, sauté, braise or use in hearty soups and stews.</p> <p><i>Renee's Garden</i></p>
Wild Garden Frills	Heirloom	<p>Especially tender, mild &amp; simply delicious Siberian heirloom kale mix with blue-green frilled leaves. Highly nutritious, long-standing, weather tolerant and wonderfully ornamental.</p> <p><i>Renee's Garden</i></p>
Winterbor	F-1 Hybrid	<p>60 days. One of the most winter-hardy kales, Winterbor has finely curled, thick, blue-green leaves. Very vigorous, it can grow up to 2 feet, developing an abundance of ruffled leaves. A magnificent early spring and late fall kale.</p> <p><i>Territorial Seeds</i></p>
<b>Tomatoes</b>		
Pompeii Roma	Plum	<p>Imported from Italy where tomato breeding is a passion, the tall productive vines of Pompeii load up early with heavy clusters of big elongated plum tomatoes with rich flavored meaty flesh. This great tasting, traditional "Roma" type tomato has been endowed with new hybrid vigor and disease resistance for heavy harvests over a long season. You'll fill baskets with delicious fruit to use fresh or simmer in thick, tasty sauces with plenty to can or freeze to warm up winter's kitchen.</p> <p><i>Renee's Garden</i></p>
San Marzano	Plum	<p>The Real Thing! Treasured old Italian variety whose reliable heavy yields of plump, elongated fruit taste great fresh picked and stand out for cooking into rich, thick sauce.</p> <p><i>Fedco Seeds</i></p>

Cipolla's Pride	Plum	<p>Large, refined sauce tomato. Tough plants produce impressive yields of high-quality 10–16 oz. fruits in a concentrated set, which is ideal for home gardeners harvesting for canning and sauce. The flavor is fantastic and fully developed. Dry texture ensures fruits cook down quickly. Selected by the Cipolla family and submitted to us by Larry Cipolla of Minnesota. The original seeds were brought to Brooklyn, NY from Sicily in 1906 by Larry's great grandfather, Emilio. The variety was then grown for decades on the 20-acre family homestead in Connecticut where it was lovingly referred to as "Grandpa's Tomato". Larry continued to select the variety, renaming it Cipolla's Pride. Indeterminate.</p> <p><i>Johnny's Selected Seeds</i></p>
Sungold	Cherry	<p>Intense fruity flavor. Exceptionally sweet, bright tangerine-orange cherry tomatoes leave everyone begging for more. Vigorous plants start yielding early and bear right through the season. Tendency to split precludes shipping, making these an exclusively fresh-market treat. The taste can't be beat. 15-20 gm. fruits. High resistance to fusarium wilt and tobacco mosaic virus. Indeterminate.</p> <p><i>Johnny's Selected Seeds</i></p>
Hartmann's Yellow Gooseberry	Cherry	<p>Originally from the J. M. Hartman and Daughters Seed Company in Indianapolis, Indiana. Hundreds of large yellow cherry tomatoes per plant. Mildly sweet flavor adds good color to salads and salsa. Indeterminate, 75 days from transplant.</p> <p><i>Seed Savers Exchange</i></p>
Chadwick's Cherry	Cherry	<p>Climbing, heavily laden vines produce large sized cherries with rich, full tomato flavor. Heirloom favorite of Alan Chadwick, a true Grand Master of sustainable, organic techniques in the US.</p> <p><i>Renee's Garden</i></p>

Red Zebra	Slicing	A natural cross between Tom Wagner's Green Zebra and an unknown parent. Discovered by Jeff Dawson in his California fields and listed in the 2003 SSE Yearbook. Gorgeous 2½" round fruits are blood-red overlaid with jagged carrot-orange stripes. Top quality uniform strain, very productive. Slightly tart flavor. Indeterminate, 75-80 days from transplant. <i>Seed Savers Exchange</i>
Ukrainian Purple	Plum	Original stock of this variety came from Irma Henkel in Ukraine. Plum-shaped fruits are 3-4" long and weigh 6 ounces, generally crack-free. Great flavor, sweet and meaty. Plants are very productive. Indeterminate, 80 days from transplant. <i>Seed Savers Exchange</i>
Chianti Rose	Slicing	This big, beautiful beefsteak tomato with fabulous flavor is a cross between the famous pink Brandywine and a treasured family variety from Italy. Juicy, flavorful, and heavy in the hand, Chianti Rose tomatoes are thin skinned with smooth, creamy flesh and glowing rosy-red color. The strong vigorous vines with potato leaf foliage tolerate cooler summers and are more crack-resistant and uniform than other large-fruited heirlooms. <i>Renee's Garden</i>
Mountain Magic	Saladette	Excellent flavor and late blight resistance. Mountain Magic produces high yields of 2 oz., bright red, round salad tomatoes with very sweet flavor. The uniform, crack-resistant fruits may be truss harvested. Great in salads or right off the vine. High resistance to <i>Fusarium</i> wilt races 1, 2, and 3, late blight, and <i>Verticillium</i> wilt; and intermediate resistance to early blight. Indeterminate. <i>Johnny's Selected Seeds</i>

Sweet Prince	Saladette	A basic-looking tomato that tastes anything but, combining uniform abundance in the field with sweet and vibrant flavor. Very versatile in the kitchen—if you can resist eating them raw. Resistant to verticillium wilt, fusarium wilt and late blight, with moderate resistance to early blight foliage symptoms. 65 days from transplant. <i>Row 7 Seeds</i>
Midnight Roma	Plum	A deep purple-red paste tomato packed with phytonutrients. In the rows, it will stop you in your tracks. In the kitchen, this purple wonder shines for its quick cook time and memorable flavor. 80 days to maturity. Semi-determinate. Purple color increases with direct sun; consider plant maintenance to increase exposure. 80 days from transplant to maturity <i>Row 7 Seeds</i>
Yellow Pear	Pear-Shaped	An indeterminate, early, yellow pear-shaped cherry tomato. A very heavy producer with bright yellow color. Somewhat resistant to cracking. <i>Seeds from Italy</i>
Tangerine	Slicing	Heirloom producing intense glowing-orange, juicy slicing tomatoes, heavy for their size with mild, sweet flavor and creamy texture. The tall, sturdy vines produce heavy yields over a long season. <i>Renee's Garden</i>
Mexico Midget	Cherry	Winner of SSE's 2014 Tomato Tasting. Hundreds of ½-¾" dark red cherry tomatoes on each plant. Huge tomato flavor for such small fruits. Great for salads or selling in pints. Plants produce throughout the entire growing season. Indeterminate, 60-70 days from transplant. <i>Seed Savers Exchange</i>
San Marzano II	Plum	High-quality strain of this classic heirloom paste tomato.

		<p>San Marzano is considered one of the best paste tomatoes of all time, with old-world look and taste. Whole 4–6 oz. tomatoes peel easily and cook down quickly. Various strains of San Marzano exist; this strain was selected by tomato breeder Emily Rose Haga from seeds from the USDA gene bank, which is designed to preserve genetic diversity and increase food security. The strain originates from Parma, Italy, where it was developed for the 1950's canning industry. This strain has a very traditional San Marzano shape and appearance as well as a vibrant red color. Indeterminate.</p> <p><i>Johnny's Selected Seeds</i></p>
<b>Flowers</b>		
Pacific Beauty Mix Calendula		<p>he classic lovely yellow and orange mix. Herbalists highly regard its healing gifts for treating skin conditions from sunburn to abrasions. Annual. <b>Especially attractive to pollinators.</b></p> <p><i>Fedco Seeds</i></p>
Resina Calendula		<p>The best calendula for making tinctures and oils and the one Deb Soule grows at Avena Botanicals. Its medium-sized single blooms with small eyes are extremely resinous, coating your fingers or clippers while you harvest flowers. The medicinal sticky resins impart a pleasant odor. Blossoms are primarily bright yellow with yellow centers. A few will be orange with light orange centers. Cheery flowers, good medicine. Annual. <b>Especially attractive to pollinators.</b></p> <p><i>Fedco Seeds</i></p>
Alumia Crème Brulee Marigold		<p>Alumia Creme Brulee blooms early and continues for a long season with anemone-shaped, 2.5 in. bicolor warm yellow and coppery red flowers. Robust, well-branched plants grow 10-12 in. tall, and spread slightly wider. Plant in patio containers or in the front of garden beds.</p> <p><i>Swallowtail Seeds</i></p>

Bonanza Deep Orange Marigold		<p>Large and luminous deep-orange, 2-2½ in. wide flowers. Bonanza Deep Orange is the deepest orange crested French marigold. Plants are early flowering and heavy blooming, with upright and branching growth to 10-12 in. tall.</p> <p><i>Swallowtail Seeds</i></p>
Durango Mix Marigold		<p>Extra-large blooms with outstanding uniformity. Highly branching plants. A good choice for packs, pots, and garden planting. Bloom size is 2–2 1/2". Attracts beneficial insects such as hoverflies. Also known as French marigold. Edible Flowers: Use the flowers to dress up salads and desserts or cooked in egg or rice dishes. Flavor is floral with hints of citrus and spice, and slightly bitter. Remove the petals from the flower base before consuming as the base can be quite bitter. Ht. 8–12".</p> <p><i>Johnny's Selected Seeds</i></p>
Queen Sophia Marigold		<p>Dark orange petals rimmed in gold. Queen Sophia, with its 2 1/2–3" blooms, continues to be a favorite around the world. Attracts beneficial insects such as hoverflies. Leaves of the plant are edible and are used as flavorful salad greens and garnish. Also known as French marigold. AAS winner. Edible Flowers: Use the flowers to dress up salads and desserts or cooked in egg or rice dishes. Flavor is floral with hints of citrus and spice, and slightly bitter. Remove the petals from the flower base before consuming as the base can be quite bitter. Ht. 10–12".</p> <p><i>Johnny's Selected Seeds</i></p>
Alaska Mix Nasturtium		<p>Striking variegated green and white foliage will make a formidable bush if you feed it heavily. But go easy on the nitrogen if you want to eat lots of its tangy yellow and orange blossoms. Edible flowers with spicy sweet fragrance lend a peppery-sweet taste to salads, leaves also edible. A great plant for hanging baskets. 16".</p> <p><i>Fedco Seeds</i></p>

Empress of India Nasturtium		Hailed as a “great novelty” when introduced in 1884, and still popular today. Dark purplish-green edible leaves and stems make a perfect background for the edible spicy-hot brilliant crimson-scarlet flowers that stand out in bold relief. A good contrast with other nasturtium varieties. Do not feed heavily. 16" plants. <i>Fedco Seeds</i>
Peach Melba Nasturtium		Named for the dessert—peaches with raspberry sauce—that Escoffier created to honor 19th-century operatic soprano Nellie Melba. Recommended by Eva Sommaripa and other growers who treasure its unique delicacy. Primrose-cream edible blossoms with pearly red centers look like miniature cut peaches with dollops of sauce. Sets its abundant blooms above the compact edible lily-pad foliage. <i>Fedco Seeds</i>
<b>Snapdragon</b>		
Tetra Mix Snapdragon		Robust, scented flowers in an abundance of colors hearken back to old-fashioned annual cutting gardens. The undeniable vintage charm of this semi-dwarf snapdragon, which grows from 18-24" high, enlivens garden beds and borders, as well as bouquets. Annual. <i>Seed Savers Exchange</i>
<b>Petunias</b>		
Daddy Mix		
Mixed Petunias
